

Punch Cutter II

Specifications

Weight	21,580lbs (9,788kg)
Tongue Weight	2,720lbs (1,233kg)
Rear Axles Weight	18,860lbs (8,554kg)
Travel Height	162" (411.5cm)
Work Height	220" (558.8 cm)
Travel Width	96" (243.8 cm)
Work Width	209" (530.8 cm)
Travel Length	258" (655.3 cm)
Work Length	360" (914.4 cm)
Hitch	3" Tow Ring or 2" King Ping
Axles	Tandem With Dual Tires
Suspension	Leaf Spring Suspension
Tires	ST235/80R16LRE
Brakes	12 1/4" x 7 1/2" Air Brakes
Fuel Tank Capacity	42 Gallons (159 Liters)
Oil Tank Capacity	44 Gallons (167 Liters)
Hydraulic Oil Spec.	Dextron III or ISO 32
Diesel Engine (opt)	Kubota 38 HP turbo
Electric Motor (opt)	25 HP Motor 3 phase
Blade Size	7"
Roller Bed	4 Hydr Powered Bed Rollers
Clam Gates	Two Hydraulic Clam Gates To Hold Tire
PLC	Automatically Turns Tires and Punches
Outrigger	Two Hydraulic Outriggers and Two Manual Outriggers
Rec. Max Tire Capacity	Up To and Including 70/70
Rec. Min Tire Capacity	3300/R51
Average Hourly Production	4-5 OTR Tires Per Hour

Option

Radio Remote

Used To Setup
Machine For Punching

The Eagle Punch Cutter II is portable and designed to split OTR tires into two halves, cutting through the center of the tread. The Punch Cutter II can handle a range of tire sizes, from a rim size of 39 inches and a tread width of 37 inches up to and including a 14 foot diameter OTR tire. In addition to manual use, the Eagle Punch Cutter II is programmed to punch automatically and split an OTR tire without an operator. The Machine makes 5-6 inch cuts at a time (7 inch blade), the tire turns on the turn table and cuts the OTR tires into the two halves; once they have been cut into two halves, the titan II can cut them into smaller sections. On a 12 or 14 foot tire the punch cutter can split a tire in approximately 10-12 minutes.

The Eagle Punch cutter is an important part of the process because of the thickness of the rubber in the shoulder of some OTR tires (70/70/57's) is 14" of solid rubber and also because of the width of their tread
